

HDMI FULL HD 1080P SPY CAMERA DVR HIDDEN IN SILVER DIGITAL BEDSIDE ALARM CLOCK

DCG-CAM STYLE G DIGITAL CLOCK CAMERA

This electronic LCD alarm clock provides time, date, week, alarm clock and stopwatch but more interesting is the following. An amazing 5 mega pixel video camera with 1440*1080P video recording resolution and 1600*1200 photo resolution. It has motion activation and night vision infra red so can be used day or night for good results. Remote controlled for activation up to 3-4 metres line of sight. This product uses a 2000mA high capacity lithium battery lasting more than 8 hours continuous video recording or 20 hours voice recording. Motion detection does also extend the battery life by another potential 4 hours depending on its activity. It is has a reasonable quality sound recorder with or without video that can be heard without any problems. motion detection is recorded in 1 minute files and constant record in 10 minute files. Each file can be watch seamlessly using standard media players on PC or Macs.
