

MINI BUTTON SPY CAMERA DVR WITH 2 METRE POWER CABLE TO POWER BANK OR 110-240V AC

The mini button spy camera video recorder has a 2 metre power connection cable that can be connected to the power bank battery or 110-240v AC with charger (both included). It is very simple to use with single on/off switch that starts recording when switched on and stops when off - it's that simple. Just wear it, hide it or hold it and film away with the supplied screw on button lens that when removed has a small flat pinhole lens. This makes this useful for a multitude of uses requiring a quick installation. The power bank battery lasts for 24 hours recording camera can record on mains for longer use.
