Description

The Advanced-Vision Camera doesn't need any additional enclosures, brackets, heaters or lenses to use it indoors or outdoors.

In fact, it's built to such a high quality, the lens & electronic section are sealed to a staggering IP67 rating, better than any camera in its class.

With an outstanding picture quality and choice of lens up to 12mm, the Advanced-Vision can be used in a wide range of applications.

ADVANCED-VISION NITEDEVIL 8MM CAMERA CAM408

And now with NiteDevil Capabilities!

IT'S KEY FEATURES ARE:

NITEDEVIL - Sees in the dark!

Originally developed for pubs & nightclubs, the camera's NiteDevil electronics have superb capabilities in low light situations whilst unlike most other cameras, it will still retain some colour information within the picture.

Great for identification in low light conditions!

A BUILT IN HEATER - Helps to prevent the lens frosting over on cold winter mornings, working down to an external air temperature of -25°C.

ATTRACTIVE TAPERED DESIGN - In conjunction with the built-in heater this design helps prevent the build up of snow on the camera minimising chances of impaired vision.

A TOUGH RESIN FILLED INTERIOR -The sensitive electronics of the camera are completely encased in a polymer resin to provide the ultimate protection against water ingress and shock. Unlike some other cameras, condensation is not a problem with the Advanced-Vision camera.

A UV STABILISED LENS COVER - Toughened to help prevent scratches and UV stabilised to prevent the camera lens from becoming 'opaque' due to prolonged exposure to sunlight.

A ROLL OFF DRIP LIP- A cleverly engineered inner lens ring helps guide water around the lens rather than across it to maintain the optimum picture in heavy downpours.

A CLEVER BRACKET ARRANGEMENT - This allows excellent movement on both the horizontal and the vertical plane as well as facilitating wall and ceiling mounting.

* When fitted as per instructions. **Based on electricity costs of 6.5p/kwh

The Advanced-Vision Camera - Outstanding Picture Quality - Outstanding Value.
