

SPY CAMERA & DVR IN COKE COCA COLA CAN FULL HD REMOTE CONTROL

PLEASE NOTE THIS ITEM DOES NOT HAVE MOTION DETECTION

This spy camera makes a great covert security camera for at home or work where you need to catch someone out or simply monitor who comes and goes. It has many features and the remote control is one that makes it really practical. This camera can be left for days before actually needed and can then be activated by its remote control. Once activated it will record continuous until it is switched off by the remote. Ideal anywhere in almost any environment whether at home, work, car or outdoors and no one would ever guess or suspect that this is an actual spy camera + DVR. The tiny pinhole lens is well hidden into the body of the can and no one will see without a very very close inspection and even then you would not know until shown. The bottom of can is magnetic and slides off so you can access the hidden USB port. This definitely has its advantages in many situations.

With high definition quality camera and DVR capable of recording up to 2 hours of uninterrupted audio and video. This audio is loud and clear and the video images are sharp and vibrant making a great camera. Supplied with 4gb built in memory capable of recording up to 2hrs of audio and video.

Perfect for personal investigations, secret surveillance and other covert activities. This is a hidden camera that no one will ever suspect and definitely not be on the lookout for. The can is identical to the classic coca cola design and/or zero coke design which can be placed literally anywhere on a shelf, cupboard, sideboard, wall, car e.t.c this is a hidden spy camera DVR straight from the pages of James Bond!

This is the most advanced coke can camera with full HD camera with a resolution of 1280 x 960 pixels.
