

**FULL HD H.264 720P SPY CAMERA DVR MINI DIGITAL CLOCK -  
MOTION & REMOTE ACTIVATED  
STYLE E**

This NEW 2014 MINI spy clock camera makes a great covert security camera for at home or work where you need to catch someone out or simply monitor who comes and goes. Recording video images never seen before from such a device with a 5 mega pixel camera and H.264 coding it guarantees a perfect image and recording. It has many features and the remote control is one that makes it really practical. This camera can be left for days before actually needed and can be remotely activated up to 25 metres away. Once activated it will only record when there is movement by the motion activation mode. Ideal anywhere in almost any environment wether at home or work and no one would ever guess or suspect that this is an actual spy camera + DVR. The tiny pinhole lens is so well hidden into the face of clock no one will see without a very very close inspection and even then you would not know until shown. The hidden USB port and the Micro SD card slot is in the battery compartment. This definitely has it advantages in many situations and makes it possible to film when not there without making it obvious. High capacity battery capable of recording up to 6 hours of uninterrupted audio and video that is so loud and clear you will be very impressed. Capable of storing 32 hours of video on a 32GB Micro SD card (not included). Simply charge up (8hrs) insert an SD card (not included) and be ready to secretly film.

Perfect for personal investigations, secret surveillance, and other covert activities, this is a hidden camera that no one will ever expect and definitely not be on the lookout for. The clock is very stylish and modern and can be placed literally anywhere on a shelf, cupboard, sideboard, bedside cabinet, e.t.c this is a Hidden DVR straight from the pages of James Bond!
