

MINI DVR SPY CAMERA VIDEO RECORDER IN TINY TABLE MIRROR WITH MOTION DETECTION

This tiny table / bedside mirror spy camera with DVR is a cheap low cost solution to some more costly spy camera DVRs available. Records 720*480P video @ 30fps and in good lighting conditions is as good as any camera out there. As the light goes down it is still fairly acceptable for the price and can record for over 2 hours constant. With motion detection record you return a few hours later and view exactly and only what happened while you were gone. It is a small mirror standing 15cm high (6 inches) something you can leave unnoticed and discreetly in most places. Can be pointed up or down to face exactly what you want to record.

Features and Specifications

Records video with audio

Takes photo's

motion detection
