Please read each description carefully before making your choice.

UK / US / EUROPEAN SPY CAMERA DVR WITH REMOTE CONTROL 110-240V AC CHARGER

This camera plugged into a live mains socket will record 365 days a year. A high definition 1280 x 720P video record resolution with low light level recording. This camera is perfect for quick and easy 24 hour surveillance. It has a very good motion activation that records 3 minute files each time movement is detected and can detect a car 6-10 metres and a person 3-5 metres. Sound is good as it heard me talking in another room, does have background hiss at top volume. This thing is great it records really nice video with good sound 24 hours 365 days a year. It claims to have night vision but we like to call it low light as it certainly does not see anything in the dark. The charger itself is real too and has a USB DC output of 5V 400mA that can charge phones and similar small devices.

UNIVERSAL UK/US/EUROPEAN MAINS ADAPTER

A low cost simple device that once plugged into a live 110v-240v AC mains socket it instantly starts recording audio and video in auto motion detect mode. It will constantly record whilst motion is present and stop after 10 minutes. If motion is still present the spy camera DVR will create a new 10 minute file and continue to record. If not it will stay active ready to start recording whenever something happens in front of it. An ideal security device for quick and easy installation.
