Covert Camera

Built-in 4GB DVR

Records audio & video

Classic business style Tie

Remote control for easy use

Built in USB port for easy data transfer

License to Film! This great undercover DVR fashionable covert camera in a Tie offers next level surveillance with video and audio recording that is suitable for the office, trade show, business meetings etc. It may be an innocent looking tie, but it secretly houses a 4GB DVR kit with a built-in high capacity 500mA rechargeable polymer Li-battery, and can be triggered to record as far as 10 meters away using a wireless key chain remote control. With its well hidden pin hole camera, this records 3 hours per charge. This allows you to record many video clips without having to worry about battery power. This covert camera with wireless remote is perfect for Journalists on assignments, sting operations, Law enforcement, private investigators, in fact Its perfect for anyone who wears a tie! The DVR is a plug and play device, meaning once you`ve finished recording, all you have to do is open the secret compartment within the tie and insert it into any USB port on your laptop or computer. Then, enjoy watching those easy earned surveillance recordings.

The tie is easy to operate, it comes with an easy-to-use toggle on/off master switch, so when you`re ready to record, just press the remote button for 2 seconds and the LED will indicate that the DVR within the Ties has started recording. Then flip the Tie over (the LED indicator light is on the backside) and you`re ready to go!

This awesome gadget is in stock now. Get yours today before they sell out!
