

COVERT STEALTH HIDDEN COLOUR SPY CAMERA IN LEATHER HANDBAG

Great for covert stealth secret filming / surveillance applications. This Handbag camera has a high quality camera with audio built inside, the camera is very well hidden inside the lining. You can carry this bag as normal and secretly film what is happening in front of you without looking out of place. The camera is mounted on the side of the bag as shown in the picture. It's wide angled pinhole lens allows you to film close up without losing your required image. The fixed focus also makes it possible to film from a distance capturing good clear images in both bright and dull situations. Very convenient for filming at home or work as you can carry and place this camera discreetly to exactly what you want to film and record.

The bag is of good quality and measures a moderate 22cm x 14cm x 5cm. Inside is a camera / microphone / DVR / USB lead and ON/OFF switch. This camera/DVR is radio controlled so you don't need to open it to start recording, in fact you don't need to be in the same room - as the remote can operate over 10 metres. There is still room inside the bag for some personal items too.

I can custom build covert camera's into any type of bag, clothing and objects (within reason). Please email me with your requirement.

The perfect tool for mystery shopping, surveyor's and private detective's.

The camera has a very wide angled lens of 92 degrees. Wide enough to capture everything that happens in front and either side of it. Also includes sound to record any conversation and other sounds that occur around it.

Features & Specifications
